Professional Summary

Entry level IT and networking candidate with hands-on experience in IT support labs, Windows systems and networking fundamentals. Skilled in troubleshooting user issues and configuring virtualized environments. Seeking an **IT Internship** to contribute to service desk operations, device setup and technical support while gaining real world enterprise IT experience.

Technical skills

- **Networking:** TCP/IP, IP Addressing, DNS, DHCP, VLANs, ACLs, VPN basics, Cisco Routing & Switching.
- **Operating Systems:** Windows 10/11, Windows Server, Linux (basic).
- **Productivity:** Microsoft 365 environment.
- **Security & Networking Tools:** Wireshark, Nmap.
- **Tools & Platforms:** VMware Workstation, Cisco Packet Tracer, GitHub, Chrome Remote Desktop.
- **Programming Language:** Python (basics), C++ (basics).

Education

Higher Diploma in Network Technology and Cybersecurity

March 2024 – Sep 2025

Cardiff metropolitan university-UK

Relevant Coursework: Networking Fundamentals, Cybersecurity Basics

Practical Projects

Virtual Lab Setup – VMware

Nov 2024 – Dec 2024

- Deployed **3 virtual machines** (Windows Server, Windows Client, Kali Linux) simulating an enterprise IT environment.
- Configured **Active Directory** to manage **10+ user accounts and groups**, supporting authentication and access control.
- Implemented **DNS and DHCP services**, achieving **100% successful IP assignment and name resolution** within the lab.
- Performed basic **user onboarding tasks**, including account creation, password configuration, and system access testing.
- **Troubleshooted** connectivity and authentication issues, reducing setup errors during lab testing.

Network Security Lab Simulation - Cisco Packet Tracer

Aug 2024 – Sep 2024

- Designed a simulated enterprise network with **4+ VLANs** to improve traffic segmentation and logical organization.
- Configured **Access Control Lists (ACLs)** to block unauthorized traffic, reducing simulated attack paths by **~60%**.
- Enabled **SSH remote access** on **100% of routers and switches**, replacing insecure management methods.
- Applied **port security** on access switches to limit unauthorized device connections.
- Used Packet Tracer tools to **identify and resolve connectivity issues** across multiple network segments.

Skills & Knowledge

- Customer-focused IT support mindset
- Ability to work independently and in team environments
- Strong problem-solving and troubleshooting skills
