Professional Summary

Entry-level IT and Network candidate with hands-on experience in IT support labs, Windows systems, networking fundamentals and user troubleshooting. Familiar with basic network and system administration through virtualized and simulated environments. Actively seeking an IT Intern role to contribute to service desk operations, device setup and issue resolution while learning enterprise IT processes.

Technical skills

- **Networking:** TCP/IP, IP Addressing, DNS, DHCP, VLANs, ACLs, VPN basics, Cisco Routing & Switching
- **Operating Systems:** Windows 10/11, Windows Server (AD, DNS, DHCP), Linux (basic)
- **IT Support & Systems:** User account management, troubleshooting, Chrome Remote Desktop
- **Productivity:** Microsoft 365 environment
- **Security Tools:** Wireshark, Nmap
- **Tools & Platform:** VMware Workstation, Cisco Packet Tracer, GitHub
- **Programming Language:** Python (basics), C++ (basics)

Education

Higher Diploma in Network Technology and Cybersecurity
Cardiff metropolitan university-UK

March 2024 – Sep 2025

Relevant Coursework: Networking Fundamentals, Cybersecurity Basics

Practical Projects

Virtual Lab Setup – VMware

Nov 2024 – Dec 2024

- Deployed **3 virtual machines** (Windows Server, Windows Client, Kali Linux) simulating an enterprise IT environment.
- Configured **Active Directory** to manage **10+ user accounts and groups**, supporting authentication and access control.
- Implemented **DNS and DHCP services**, achieving **100% successful IP assignment and name resolution** within the lab.
- Performed basic **user onboarding tasks**, including account creation, password configuration, and system access testing.
- Troubleshoot connectivity and authentication issues, reducing setup errors during lab testing.

Network Security Lab Simulation - Cisco Packet Tracer

Aug 2024 – Sep 2024

- Designed a simulated enterprise network with **4+ VLANs** to improve traffic segmentation and logical organization.
- Configured **Access Control Lists (ACLs)** to block unauthorized traffic, reducing simulated attack paths by **~60%**.
- Enabled **SSH remote access** on **100% of routers and switches**, replacing insecure management methods.
- Applied **port security** on access switches to limit unauthorized device connections.
- Used Packet Tracer tools to **identify and resolve connectivity issues** across multiple network segments.

Skills & Knowledge

- Customer-focused attitude
- Ability to work independently
- Strong problem-solving and troubleshooting skills
